Filter Fabric LF

Professional grade fabric for dewatering and run-off protection. Use around perforated pipe to keep out debris and maintain water flow. Protect septic drainage systems from silt and native backfill. Creates stable subsoil with less ground movement. Can be used behind retaining walls and under mortar/ pavers/ crushed rock or mulch paths to increase longevity. Prevents the mixing of soil with aggregate or sand base. Minimizes the effects of rutting/ low spots/and ground heave on patios and driveways. Ideal on landscaped slopes to reduce runoff and keep decorative material in place.
